

OCEANWORLD AQUARIUM

CLASSROOM SPLASH ACTIVITY

INFORMATION SHEET AND WORK SHEET

Junior

Hi ! My name is **Nemo the clownfish**. This is my anemone, I can't live without her in the ocean.

She protects me thanks to her tentacles. She is carnivore so she eats meat and fish and she catches her prey with her stinging. But my skin is really special, she can't kill me. She shares her meals with me.

At the same time, I protect her from other fish who want to eat her tentacles.

My name is **Molly the turtle**.

I love eating crustaceans and shellfish !

I lay my eggs on the beaches of the Mediterranean sea.

Do you know that I use the orientation of the waves to find my way in the ocean ?

I can travel great distances as well !

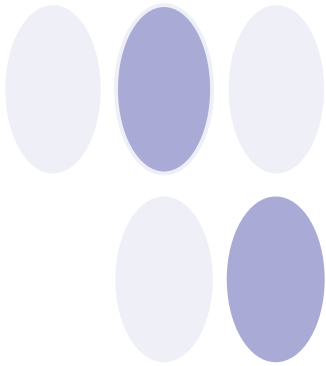

My name is **Spike the sandtiger shark**.

I can measure up to 3 meters and I can weigh up to 150 kg.

Look at my teeth, do you know that they grow all though my life ? The old teeth fall out and are continually replaced with new ones.

In Oceanworld Aquarium, I eat twice a week.

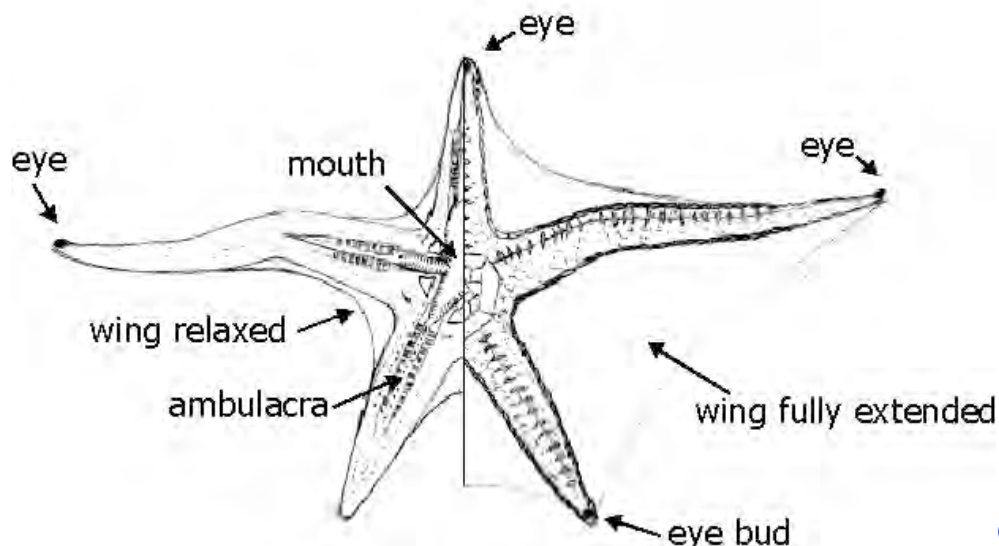

My name is **Stella the starfish**. I am really special because if I lose an arm, it can grow back again, like the lizard with his tail !

There are lots of types of starfish and you can find us in every ocean !

Do you know that I have two stomachs ?
I can leave one of my two stomachs out of my body in order to eat prey larger than me.

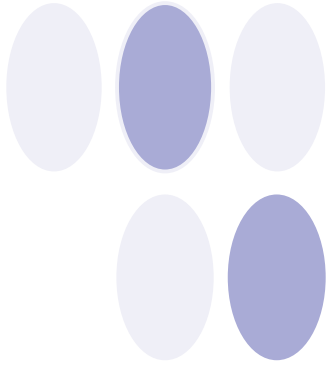

STARFISH BODY PARTS

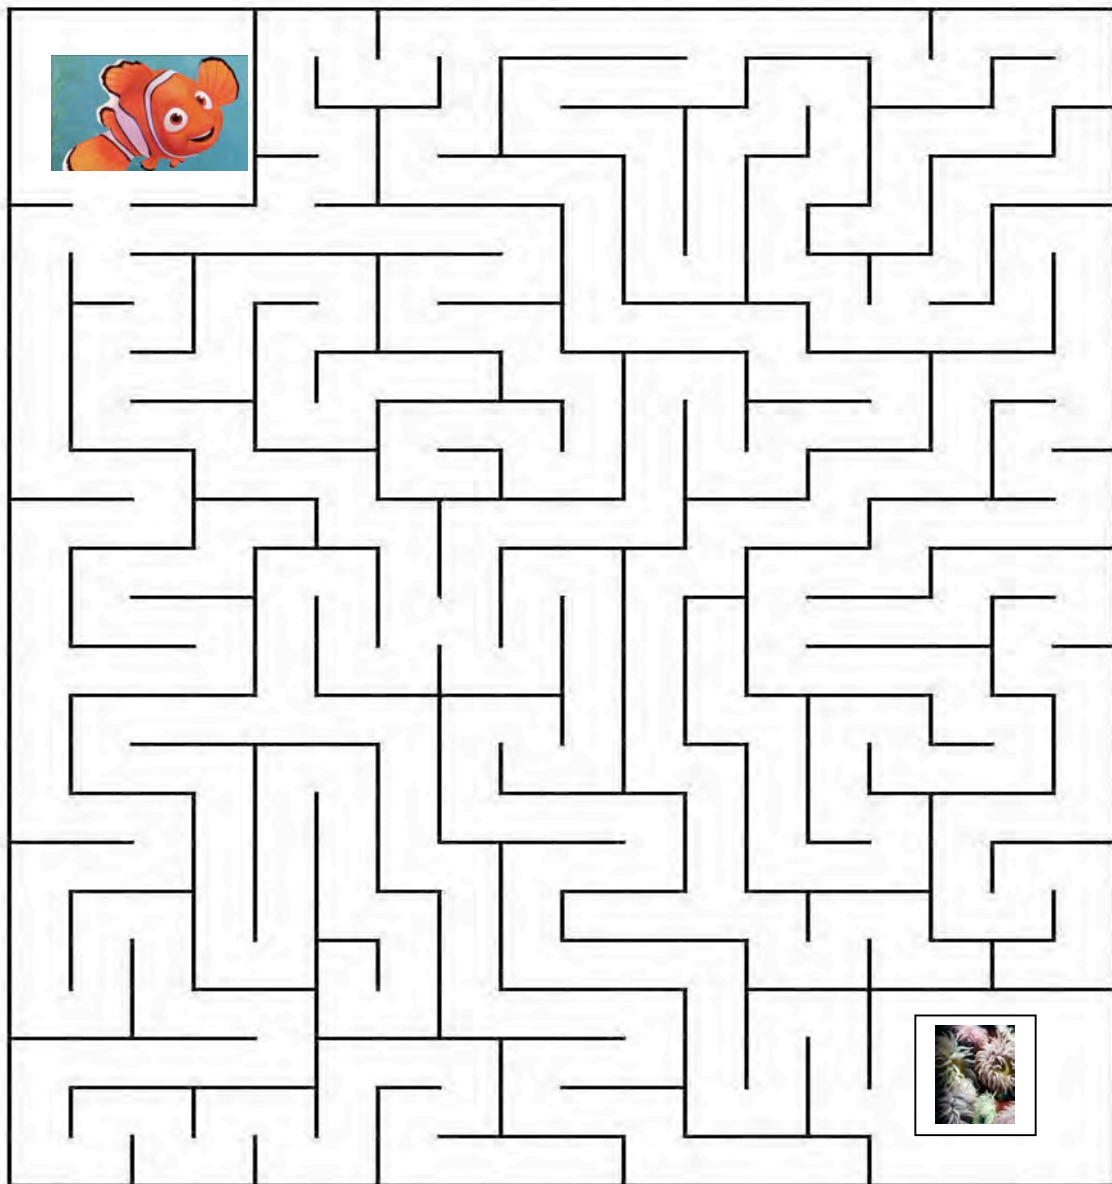

dtiger shark.

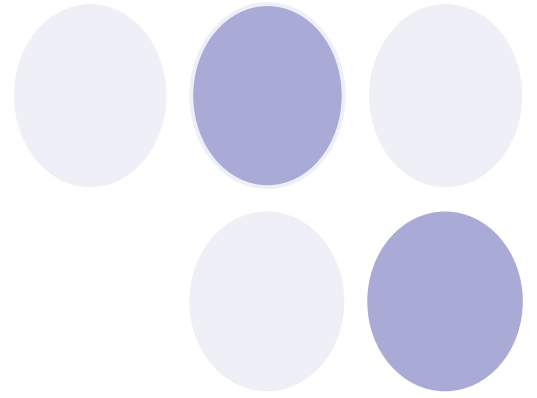

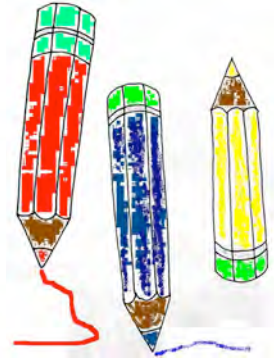

I can measure up to 3 meters and I can weigh up to 150 kg.

Look at my teeth, do you know that they grow throughout my life ? The old teeth fall out

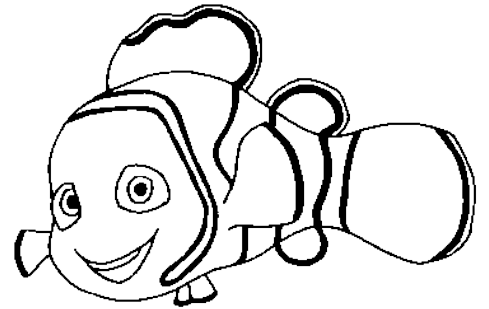

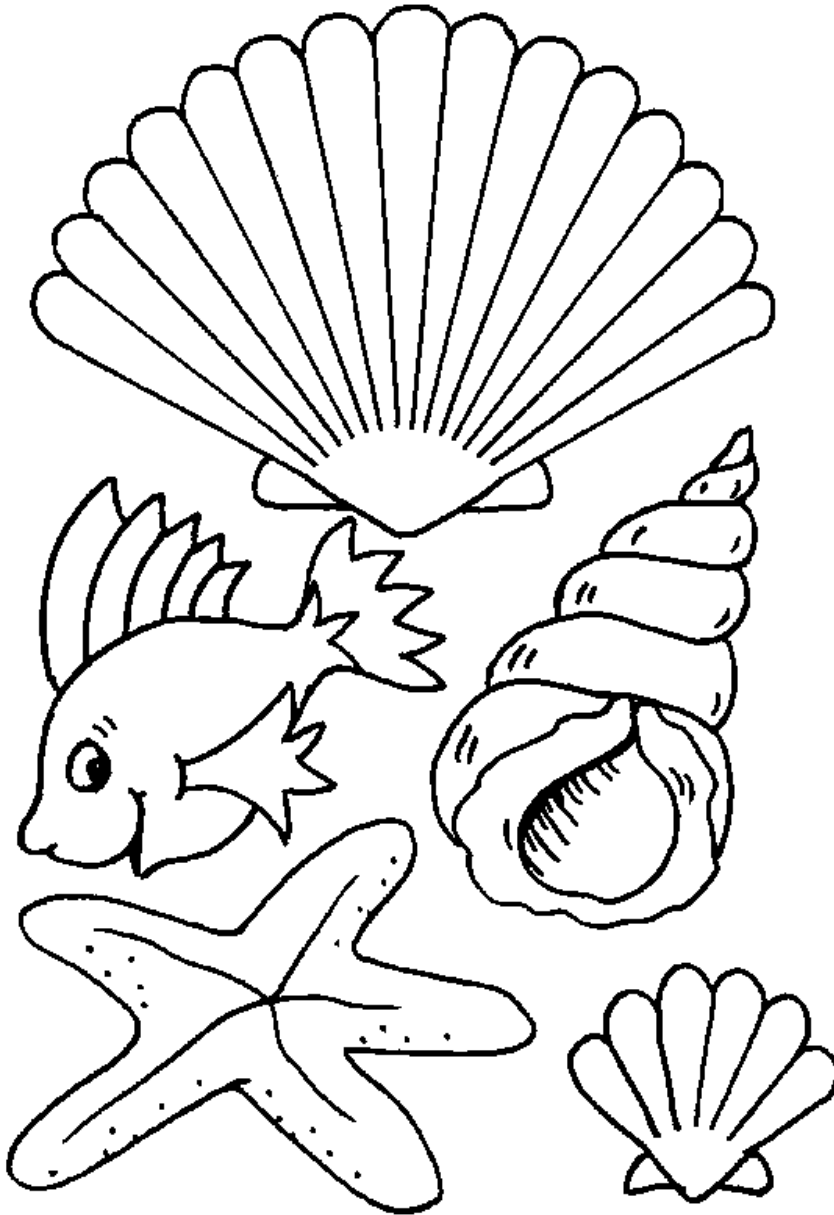

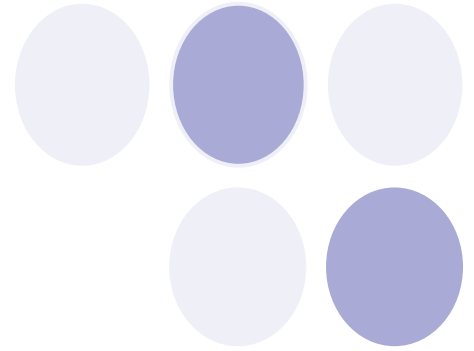

Help Nemo to find his anemone !

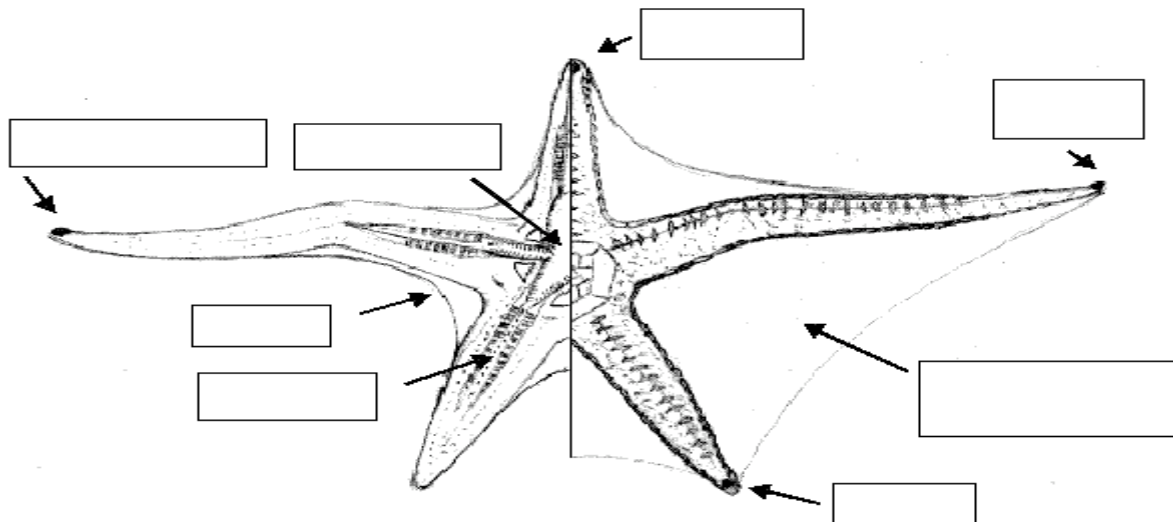

Do your own thing ! Show us your artistic talent !

REMEMBER !

GUESS WHAT THIS ANIMAL IS?

- I am a rare animal.
- I can hide in the seaweed.
- I am one of the slowest swimmers in the world.
- Only the daddies can have babies !
- I can have 200 babies at one time !
- Who I am ???
